**BRANICK PRODUCT RELEASE**

February 21, 2012

**American-Made Branick Rolling Jacks**

**Fargo, ND** –Made at their manufacturing facility in Fargo, ND, Branick Rolling Jacks fit the most popular 4-post lifts, replacing original equipment jacks. Available in both 7,000 and 9,000 pound capacity, Branick’s heavy duty, air-hydraulic powered rolling jacks come with telescoping mounting brackets and the lift arms adjust from 33 to 50 inches. The narrow width allows easy access to the area of the vehicle being serviced, and the spring-loaded mounting bracket rollers allow the jack to be easily positioned, and then automatically locked into place when weight is applied. There’s also a mechanical 3-position lock. Branick makes jack brackets for Rotary, JBC/FMC, Hunter, Acanus, and Wheeltronics. Branick’s quality jacks will carry the load for you with ease.

To learn more about Branick Jacks, call 800.437.4394 or email [sales@branick.com](mailto:sales@branick.com).

Branick was founded 94 years ago with the introduction of the tire spreader, invented by Earl Branick. Since then, Branick has been an industry leader in tire service and tire inflation equipment, nitrogen systems and retread equipment. With over 750,000 customers worldwide, Branick proudly remains focused on the tradition of quality instilled by Mr. Branick, while the team of R&D engineers continues his legacy of innovation. Today, Branick is leading the industry into a greener tomorrow by focusing on fuel conservation, and helping customers reduce their carbon footprint. With manufacturing locations in the USA Heartland, Branick Industries is committed to maintaining the well-earned reputation for quality, service, innovation, and value.
