To: Branick Industries

From: Bryant Brake & Tire

Just wanted to let you know how satisfied I am with my Branick nitrogen machine. I contemplated my decision to make the investment for several months. I looked at several types of equipment along the way and until I was introduced to the Branick product I was skeptical about the investment. My Branick Nitrogen machines is almost like having another technician in the shop, for it's ability to generate revenue. It is so simple and efficient to use. Each and every customer that comes in our door receives the opportunity to have nitrogen filled tires. I'm not sure we would push the service as much as we do if we had made the purchase of lesser equipment. I have gotten nothing but positive feed back from all of our customers that have made the small investment. I purchased the equipment 2 months ago and I truly believe that the Branick machine will pay for itself in approximately 4 to 5 months. Again I just wanted to drop you a note and thank you for manufacturing such a quality product. And every shop that has yet to make the investment needs to do their homework obviously. You can have them call Shawn @ Bryant Brake & Tire 501-847-8838 or e-mail me at skobbt@aol.com

Thanks again,

Shawn Omholt
