BINGHAM FARM, MI 48025

Mr. Phil Giallombardo
Branick Industries
P.O. Box 1937
Fargo, ND 58107

Dear Mr. Giallombardo,

I'm writing to let you know that we've been running with nitrogen in our low-boy truck tires for the last 4 years and can't believe the difference in our tire costs. And, our low-boys have a gross vehicle weight of 160,000 pounds!

With nitrogen, our mileage per 1/32 of tread wear has increased 28% on our steer tires, and 32% on our drive tires! Our trailer tires normally last a maximum of 2 years and we're just pulling off the first 4 this week – after 4 years!

We also use the Crossfire Dual Tire Pressure Equalization System. With both nitrogen in our tires and the Crossfire system, it couldn't be any easier to reduce tire costs.

We plan to start using nitrogen along with the Crossfire system on our 32-tire flow-boys and start piling up some real savings.

For our money, nitrogen is the answer to lower tire costs!

Sincerely,

Jamie Jacobs

Curtis Jeanette
