Phil

We have been having great success with our nitrogen unit since we purchased it in May. We are selling it as a add on to a purchase along with selling nitrogen to walk in customers. We have been averaging three hundred sales a month. I'm also getting feed back from customers that they are experiencing 1.5 to 2.0 miles per gallon of fuel. I also have had one customer who had us install nitrogen in his motorcycle tires and has told me that he is getting much better tire wear.

Thanks John Miller
