## Inflation Cage 2240

**Works with all truck tires including super-singles!**

Branick recognizes the importance of having safe, durable equipment in your tire shop. All of our cages are constructed with safety in mind, using only the highest quality steel tubing and quality construction. All Branick cages meet OSHA requirements and are constructed of 2 1/4" diameter, high tensile steel tubing. Add our auto inflation device, which handles run-flat and high pressure tires, to create a more efficient and safer environment for your staff. Keep moving while the auto inflator does all the work!

MAX TIRE WIDTH: 22.5" (CROSS SECTION)  
MAX TIRE DIAMETER: 54"  
MAX INFLATION PRESSURE: 120 psi  
SHIPPING WEIGHT: 170 lbs (NO PALLET)

BlockHead Auto Inflator  
Optional on all Cages.

## Inflation Cage 2140

**Protect your technicians and your reputation!**

Branick offers a wide variety of inflation cages including both 3-bar and 4-bar options. The 2140 Cage comes with No-Mar coating, which gives extra protection for the expensive rims that come through your shop. However, No-Mar coating is optional for all other Branick cages. Protection for both your technicians and your customers' tires - you can't go wrong with a Branick inflation cage!

MAX TIRE WIDTH: 21" (CROSS SECTION)  
MAX TIRE DIAMETER: 41"  
MAX INFLATION PRESSURE: 120 psi  
SHIPPING WEIGHT: 155 lbs (NO PALLET)

\* Branick has several inflation cage models to choose from - call for details.
