#### SPECIFICATIONS

**Max Tire Size**  
19" Cross Section  
16" Tread Width  
50" Outside Diameter

**Electrical**  
230 V / 60 H / 3 Ph

**Shipping Size**  
2800 lbs (1089 kgs)  
56" x 77" x 78"

#### FEATURES

- Single Rotation Cuts Tire
- 25 Gallon Oil Reservoir
- Hardened High Strength Blade
- 2 Hand Safety Start
- 3 Pressure Gauges
- Fast, Easy Operation

## TIME AND SPACE SAVING WORKHORSE!

The Branick HD-BTC is the perfect solution to your scrap tire problem. By cutting tires in half, it is easy to stack more of them in the same space. It also allows more tires to fit in your limited transportation space. The HD-BTC's hardened high-strength steel blade makes quick work of the job, only requiring one revolution per tire. The 25 gallon oil reserve keeps the machine running cool and the triple pressure gauges assist in operation and trouble shooting. Starting the cut requires two hands, ensuring the operator's are out of the way while cutting. Halved tires are also easier and faster to shred. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND.
