FEATURES

- Air powered tire spread
- Foot operated controls leave hands free
- Zinc Plated Rollers for Easy Rotation
- Reversible attached tool tray
- Compact Footprint to Minimize Space Required
- High powered LED light for inspections
- Debris blocking cylinder guard

HIGH PERFORMANCE SPREADER!

Branick's new Model 5130 spreader is small but it packs a lot of performance. The impact resistant, high-brightness LED light is mounted on a flexible arm making it easier for inspection and repair. Spring loaded lock pins provide fast adjustment and the zinc plated rollers make light work out of rotating the tire. The Model 5130 can handle any tire up to 14" wide and a 22.5 bead diameter. The attached tool tray keeps everything you use right where it needs to be and can be placed on either side of the spreader. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!
