

**LIGHT STAND
(5600 series)
04-0196**

**Installation/Repair
Information**

INSTALLATION:

- 1) Rotate the lower Light Stand so the light switch is orientated in the desired direction.
- 2) Attach the lower Light Stand to the upper using the 3/8-16 x 1-1/4 bolts (Item 3) and hardware (Items 11 & 15).
- 3) Run the light's power cord on the upper Light Stand to the outlet on the lower Light Stand and secure it using the clamp (Item 10) and screw (Item 4).
- 4) **(At least two people are required for this next step.)** Lift the Light Stand assembly into place onto the top of the Tire Spreader column and tray. Use the two 3/8-16 x 1 bolts (Item 2) and washers (Items 15) at the front of the Tire Spreader and the 3/8-16 x 1-1/4 bolts (Item 3) and hardware (Items 11 & 15) at the back to fasten the light assembly to the spreader.
- 5) Plug the power cord from switch to either the outlet located on the side of the spreader column, or to the nearest 110/120V outlet where the cord won't be a tripping hazard.
