HIGH PERFORMANCE SPREADER!

The Branick 5045 Tire Spreader is the solution for your Low-Pro and Wide-Base tire customers. This versatile spreader features a new design that is extremely efficient. The high-impact, high-brightness industrial light is mounted on a flexible arm making it easier for inspection and repair. The popular quick saw-tooth adjustments and the zinc plated rollers make this model a perfect mix of new technology and old comfort. It will handle tires up to 13" cross section and 40" diameter. Optional storage cabinet and riser provide space for tools/supplies and higher working height. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!
